Summary

B.Tech CSE student passionate about Full Stack Development and backend technologies. Currently working as a Full Stack Development Intern with hands-on experience in Python, AI-powered applications, and real-time web projects.

Experience

Web Developer Intern

Enkonix Software Services

May 2026 – July 2026

Developed Skillbrix, a next-generation full-stack online examination portal featuring real-time proctoring telemetry via WebSockets, customized automated grading models with negative marking, and bulk imports of questions in seconds. Engineered a premium, fully responsive interface featuring a 3D perspective dashboard with custom mouse-gaze tilt interactions.

Tech Stack: React (Vite), Node.js, Express, PostgreSQL, WebSockets, Tailwind CSS, SheetJS.

Python Development Intern

Dec 2025 – Mar 2026

Infotact Solutions

Programming & AI: Python, Pandas, NumPy, LangChain, Ollama

Visualization & Reporting: Streamlit, Matplotlib, Seaborn, ReportLab

Development & Deployment: Git, GitHub, Streamlit Community Cloud

Education

B.Tech in Computer Science Engineering

2023 – 2027

Aditya College of Engineering — CGPA: 73.7%

Projects

Skillbrix – Online Examination Portal

- **Overview:** Developed a high-performance, full-stack online examination portal designed to handle automated grading models, negative marking, and real-time evaluations.
- **Live Proctoring:** Implemented a live proctoring command center utilizing WebSocket telemetry to track candidate integrity signals, tab focus switches, and webcam gaze warnings.
- **Bulk Import Pipeline:** Built a high-throughput client-side parsing pipeline capable of bulk importing and validating 2,000+ assessment questions from Excel/CSV templates in seconds.

StateBot Pro – Autonomous CSV Data Analyst

- **Overview:** Developed an AI-powered chatbot application using Python for intelligent and smooth user interactions.
- **State Management:** Implemented state-based conversation management including greeting, query handling, response processing, and session termination.
- **Backend Architecture:** Built a scalable backend architecture to efficiently manage user requests and improve chatbot performance.
- **User Experience:** Enhanced user experience through automated response handling and optimized conversation workflows.
