Relevant Experience

Web Developer Intern · Enkonix Software Services

May 2026 — Jul 2026

- Architected and shipped Skillbrix, a full-stack online examination portal, engineering real-time proctoring telemetry over WebSockets to flag candidate integrity signals live.
- Designed customized automated grading models with negative-marking logic to streamline evaluation for large-scale assessments.
- Built a high-throughput bulk-import pipeline enabling instructors to validate and upload 2,000+ assessment questions from Excel/CSV templates in seconds.
- Engineered a premium, fully responsive interface featuring a 3D perspective dashboard with custom mouse-gaze tilt interactions using React, PostgreSQL, and Tailwind CSS.

Python Development Intern · Infotact Solutions

Dec 2025 — Mar 2026

- Built AI-powered data applications in Python using Pandas and NumPy, integrating LangChain and Ollama to automate analysis workflows.
- Designed interactive dashboards and reports with Streamlit, Matplotlib, and Seaborn to visualize insights for stakeholders.
- Automated report generation with ReportLab and deployed applications to Streamlit Community Cloud, managing version control through Git and GitHub.
- Collaborated with mentors to debug and optimize data pipelines, improving processing speed and the reliability of generated reports.

Skills

Languages

Python, JavaScript, HTML, CSS

Frameworks & Libraries

React, Tailwind CSS, Pandas, NumPy

Tools & Platforms

Git, GitHub, VS Code, PostgreSQL, Supabase, Firebase, Vercel, Railway

Projects

Skillbrix — Online Exam Portal

Full-stack exam platform with automated grading, negative marking, and real-time evaluations at scale — including a live proctoring center streaming WebSocket telemetry and a bulk-import pipeline validating 2,000+ questions from Excel/CSV in seconds. Built with React, PostgreSQL & Tailwind CSS.
